Introduction

- introduction into the problem domain
- $\bullet\;$ settling of the problem in the domain
- objective of the thesis
- scope of the thesis
- short description of chapters
- clear description of contribution of the thesis's author in case of more authors table with enumeration of contribution of authors

[Problem analysis]

- problem analysis
- state of the art, problem statement
- literature research (all sources in the thesis have to be referenced [2, 1, 3, 4])
- description of existing solutions (also scientific ones, if the problem is scientifically researched), algorithms, location of the thesis in the scientific domain

Mathematical formulae

$$y = \frac{\partial x}{\partial t} \tag{2.1}$$

and single math symbols x and y are typeset in the mathematical mode.

Requirements and tools

- functional and nonfunctional requirements
- use cases (UML diagrams)
- description of tools
- $\bullet\,$ methodology of design and implementation

External specification

- hardware and software requirements
- installation procedure
- activation procedure
- types of users
- user manual
- system administration
- security issues
- example of usage
- working scenarios (with screenshots or output files)

Figure 4.1: Figure caption (below the figure).

Internal specification

- concept of the system
- system architecture
- description of data structures (and data bases)
- components, modules, libraries, resume of important classes (if used)
- resume of important algorithms (if used)
- details of implementation of selected parts
- applied design patterns
- UML diagrams

Use special environments for inline code, eg int a; (package listings). Longer parts of code put in the figure environment, eg. code in Fig. 5.1. Very long listings—move to an appendix.

Figure 5.1: Pseudocode in listings.

Verification and validation

- testing paradigm (eg V model)
- $\bullet~$ test cases, testing scope (full / partial)
- detected and fixed bugs
- results of experiments (optional)

Table 6.1: A caption of a table is **above** it.

Conclusions

- achieved results with regard to objectives of the thesis and requirements
- path of further development (eg functional extension ...)
- encountered difficulties and problems
